PHIL 333 CRN: 12539 / ES 314 CRN: 11652

Course Description:
This course investigates the moral and conceptual dimensions of environmental issues. Different philosophies of the relation between humans and nature will be compared. Issues to be addressed include: Does it make sense to attribute intrinsic value to non-human nature? What is the moral status of non-human animals? Is animal liberation compatible with promoting flourishing ecosystems? What political or cultural factors underlie environmental exploitation? Is industrial society in general, and capitalism in particular, compatible with environmentalism? What are some alternative visions of how humans should relate to their environments?

The Instructor
Angus Taylor has a Ph.D. in Social and Political Thought from York University, Toronto. He also has an M.A. in Political Science from the University of Toronto and an M.Sc. in History and Social Studies of Science from the University of Sussex. At York the topic of his dissertation was Karl Marx’s theory of history. He is the author of *Animals and Ethics: An Overview of the Philosophical Debate*, as well as of a number of papers on political philosophy and on environmental ethics.
