Phil 201: Critical Thinking

Class times: Monday—Friday, 10:30am—12:20pm
Lectures will be held during class time via Blackboard Collaborate
Lectures will be recorded

Instructor: Dr Di Yang (pronouns: she & her)
Email: diyang@uvic.ca

Teaching assistants:
Ryan Tonkin       Vanessa Houghton
[Email address TBA]  [Email address TBA]

TA Office hours: TBD

Course description:
Arguments serve as a way to persuade others that something is true. Arguments allow us to increase our knowledge of the world in the absence of direct observation. We see arguments every day: in the newspaper, in advertising, in lectures, in common conversation. Argumentation plays such a large role in our lives that we would be remiss if we did not take the time to learn how to evaluate them effectively. In this class we will investigate various techniques that can be applied to determine the worth of arguments. There is a treatment of elementary principles of deductive and inductive logic as well as informal fallacies. An understanding of the basics of logic will help the student write better essays, read more efficiently and think critically. This course will also be of benefit to anyone who plans to write the LSAT or GRE exam.

Territorial Acknowledgement: The University of Victoria is committed to acknowledging and respecting the Lekwungen peoples on whose traditional territory the university stands, and the Songhees, Esquimalt, and WSÁNEČ peoples whose historical relationships with the land continue to this day. For more information about support for indigenous students and efforts to foster reconciliation, please visit the UVic Office of Indigenous Academic & Community Engagement.

Grading:
10 Assignments @ 4% each = 40%
4 Tests @ 15% each = 60%

No final exam.
The grading options available for the spring term will NOT apply to the summer term.
The final grade will be recorded as a percentage according to UVic's Undergraduate Grading Scale.

PLEASE NOTE:
The lectures for this course will be recorded so students need not attend live lectures everyday during scheduled class times.

However, tests will be administered during scheduled class times (10:30am-12:20pm). Tests will be available on CourseSpaces at 10:35am, and must be submitted within the allotted time (typically 90 minutes). Instructions will be provided in the first week of class. If you choose to take this course, you must be available to write the tests during the
scheduled dates and times (see course schedule below). Exceptions will be made in cases of illness or family emergency only.

Please contact me ASAP if you are currently living in a time zone which would make writing tests at the scheduled times particularly challenging (e.g. Asia or Australia). Accommodations can be made, but you must let me know ASAP (no later than May 13th).

The course schedule is tentative and subject to change. I expect to adhere to the schedule below, but we might have to make adjustments (including rescheduling tests and assignments) given the circumstances.

Course Schedule:

<table>
<thead>
<tr>
<th>Date</th>
<th>Topic</th>
<th>Assignment(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>May 11th</td>
<td>Ch. 1—Introduction; Arguments, premises, and conclusion</td>
<td>Assignment 1 Due</td>
</tr>
<tr>
<td>May 12th</td>
<td>Ch. 3—Deduction, induction, validity, soundness</td>
<td>Assignment 2 Due</td>

</table>

*All assignments are due by 8pm on CourseSpaces*

Assignments:

Assignments will be completed online through CourseSpaces. All assignments should be submitted by 8pm on the day they are due. You will have 2 attempts at each assignment. The highest mark will be counted.

If you miss the homework assignment you will be able to view the answers online after the due date as long as you have opened the assignment before the due time. Please note that it will be very difficult to do well in this course if you do not attempt most of the assignments. Late assignments will not be graded, except in cases of illness or family emergency.

Course materials:

Lecture recordings, slides, assignments, practice tests will be posted on CourseSpaces. The textbook is optional. I will say more about that during the first lecture.
Discussion forum:
I would like us to utilize the discussion forum in this class. If you have any questions about the course, whether it's administrative or content related, please consider posting it on the forum. Chances are, if you're unclear about something, some of your peers in the class will be as well. By posting your question, you can help out your peers, who might have the same question, and help your TAs, who just have to answer the question once on the forum instead of responding to multiple emails asking the same question. Your TAs will monitor the forum in order to answer questions. But if you know the answer to a question, please feel free to respond. Treat the discussion forum as a collegial space, where we can all ask questions of and learn from each other.

Academic integrity:
Cheating will not be tolerated and will result in a zero on the test or assignment or failure in the course.

Students are expected to abide by the University’s Policy on Academic Integrity. And it is the students’ responsibility to understand what constitutes plagiarism and to understand its consequences.

In particular, note that:
“Cheating includes, but is not limited to:
- copying the answers or other work of another person
- sharing information or answers when doing take-home assignments, tests or examinations except where the instructor has authorized collaborative work
- having in an examination or test any materials or equipment other than those authorized by the examiners
- accessing unauthorized information when doing take-home assignments, tests or examinations
- impersonating a student on an examination or test, or being assigned the results of such impersonation
- accessing or attempting to access examinations or tests before it is permitted to do so

Students found communicating with one another in any way or having unauthorized books, papers, notes or electronic devices in their possession during a test or examination will be considered to be in violation of this policy.

Aiding Others to Cheat
It is a violation to help others or attempt to help others to engage in any of the conduct described above.”
