## Notes to Tables One to Five

- 1 In Tables One to Four, applicants are defined as having entry points of September 2003 and a "U1" (undergraduate) application status. Admitted applicants are defined by the admission field on ISIS. Arriving applicants are those who were registered in one or more 2003/04 winter session units as at November 1 2003. The number of arriving applicants does not reconcile exactly with IA registration statistics because this analysis includes only students with September 2003 entry points.
- 2 All discussions of "secondary averages" include only those applicants whose admission was based on that average (i.e. BCCUR, BCGRD, other secondary) and who had valid data; other applicants with valid secondary average entries were excluded. Similarly, "post-secondary averages" include only BCCOL, BCUNI and other post-secondary applicants with valid data.
- 3 Total applicant data for the Faculty of Law are not available on ISIS; only admitted and arriving applicant data are available. Tables Three and Four therefore exclude or limit Faculty of Law data. Stated applicant volumes (n=12,861) are therefore lower than actual by the unreported Law applications.
- 4 The calculation of FTE values involved minor estimation in some cases. For the University overall, and within each faculty, FTE estimation is within .5 percent of actual data (as at November 1).
- 5 Applicant ages are calculated as the age at December 31, 2003.
- 6 The "previous institution" field captures the most recently attended institution.
- 7 The source for all tables is the November 1/2003 IA download of ISIS.
