## **Undergraduate Applicant, Admission and Arrival Patterns at UVic – Fall, 2005.**

The following report describes the undergraduate applicant, admission and arrival patterns for the 2005/2006 academic year.

A total of 12,108 prospective students applied for Fall 2005 admission. Offers of admission were extended to 8,314 applicants who met the admissions cut-off approved by the VP Academic and Provost. Of those admitted applicants, 4,276 students accepted the offer of admission and registered in classes in the winter term. This translates to 3,464.9 new full-time equivalent (FTE) students.

For September 2005 admission to the Faculties of the Humanities, Social Sciences, and Science, the University of Victoria set its cut-off for secondary students at 76%; this is down from a cut-off of 80% for September 2004 admission. Admissions cut-off for post-secondary transfer students was set at 65%, down from 71% in 2004.

As in previous years, the majority of registrants (59.4%) are female and more than half are aged 19 or younger with a mean age of 21.5 years. Canadian citizens comprised 86.6% of all registrants, followed by Asia and the Pacific Rim (5.3%), Europe and the Middle East (3.7%) and the rest of the Americas (2.2%).

Fifty-two percent of our new registrants applied for entry with a secondary school credential, and forty-two percent with a post-secondary credential. The academic performance of new entrants this year was 83.8% mean GPA for secondary registrants, and 76.9% mean GPA for post-secondary registrants.

### **Yield rates**

The key yield rate of Arrivals per Admission is up slightly from last year at 51.4% (compared to 50.0% in Fall 2004). Total undergraduate applications increased only slightly from 2004, but almost ten percent more applicants were granted admission than in 2004.

## Notes to Tables One to Five

- 1 In Tables One to Four, applicants are defined as having entry points of September 2005 and a "U1" (undergraduate) application status. Admitted applicants are defined by the admission field on ISIS. Arriving applicants are those who were registered in one or more 2005/06 winter session units as at September 15, 2005. The number of arriving applicants does not reconcile exactly with IA registration statistics because this analysis includes only students with September 2005 entry points.
- 2 All discussions of "secondary averages" include only those applicants whose admission was based on that average (i.e. BCCUR, BCGRD, other secondary) and who had valid data; other applicants with valid secondary average entries were excluded. Similarly, "post-secondary averages" include only BCCOL, BCUNI and other post-secondary applicants with valid data.
- 3 Total applicant data for the Faculty of Law are not available on ISIS; only admitted and arriving applicant data are available. Tables Three and Four therefore exclude or limit Faculty of Law data. Stated applicant volumes (n=12,108) are therefore lower than actual by the unreported Law applications.
- 4 The calculation of FTE values involved minor estimation in some cases. For the University overall, and within each faculty, FTE estimation is within .5 percent of actual data (as at September 15).
- 5 Applicant ages are calculated as the age at December 31, 2005.
- 6 The "previous institution" field captures the most recently attended institution.
- 7 The source for all tables is the September 15/2005 IA download of ISIS.
