## **Undergraduate Applicant, Admission and Arrival Patterns at UVic – Fall, 2006.**

The following report describes the undergraduate applicant, admission and arrival patterns for the 2006/2007 academic year.

A total of 11,576 prospective students applied for Fall 2006 admission. Offers of admission were extended to 8,443 applicants who met the admissions cut-off approved by the VP Academic and Provost. Of those admitted applicants, 4,309 students accepted the offer of admission and registered in classes in the winter term. This translates to 3,401.6 new full-time equivalent (FTE) students.

For September 2006 admission to the Faculties of the Humanities, Social Sciences, and Science, the University of Victoria set its cut-off for secondary students at 76%; this is unchanged from the September 2005 admission cut-off. Admissions cut-off for post-secondary transfer students was set at 65%, also unchanged from 2005.

As in previous years, the majority of registrants (58.5%) are female and more than half (57.5%) are aged 19 or younger; the mean age is 21.3 years. Canadian citizens comprised 88.2% of all registrants, followed by Asia and the Pacific Rim (4.7%), Europe and the Middle East (3.4%) and the rest of the Americas (1.8%).

Fifty-six percent of our new registrants applied for entry with a secondary school credential, and thirty-eight percent with a post-secondary credential. The academic performance of new entrants this year was 83.2% mean GPA for secondary registrants, and 73.0% mean GPA for post-secondary registrants.

### **Yield rates**

The key yield rate of Arrivals per Admission is down slightly from last year at 51.0% (compared to 51.4% in Fall 2005). Total undergraduate applications decreased 4.4% from 2005 due to a 16.9% drop in college transfer applicants. BC High School applications were up 2.9% from 2005.

## Notes to Tables One to Five

- 1 In Tables One to Four, applicants are defined as having entry points of September 2006 and a "U1" (undergraduate) application status. Admitted applicants are defined by the admission field on ISIS. Arriving applicants are those who were registered in one or more 2006/07 winter session units as at September 15, 2006. The number of arriving applicants does not reconcile exactly with IA registration statistics because this analysis includes only students with September 2006 entry points.
- 2 All discussions of "secondary averages" include only those applicants whose admission was based on that average (i.e. BCCUR, BCGRD, other secondary) and who had valid data; other applicants with valid secondary average entries were excluded. Similarly, "post-secondary averages" include only BCCOL, BCUNI and other post-secondary applicants with valid data.
- 3 Total applicant data for the Faculty of Law are not available on ISIS; only admitted and arriving applicant data are available. Tables Three and Four therefore exclude or limit Faculty of Law data. Stated applicant volumes (n=11,576) are therefore lower than actual by the unreported Law applications.
- 4 The calculation of FTE values involved minor estimation in some cases. For the University overall, and within each faculty, FTE estimation is within .5 percent of actual data (as at September 15).
- 5 Applicant ages are calculated as the age at December 31, 2006.
- 6 The "previous institution" field captures the most recently attended institution.
- 7 The source for all tables is the September 15/2006 IA download of ISIS.
