

Budgeting Worksheet

An important aspect of exchange will be estimating the costs and funds available to you for the duration of your time abroad. You should use online resources to get more information about costs in your host country/region, with many host universities providing living/studying cost estimates on their websites. Please use the table below to estimate your expenses and resources!

The numbers do not have to be exact, but should be as accurate as possible. Your attention to detail will help demonstrate to the ICS Exchange Team how well you have planned and anticipated the financial viability of your exchange term(s).
