

ICS EXCHANGE PROGRAM

Proposed Study Plan

To anticipate the courses you will taken during your exchange term(s), please fill out the proposed study plan below. You should use the following resources to complete the form:

- Guidance from your UVic academic adviser
 - review your CAPP report, which outlines the UVic program requirements needed for you to complete your degree. This information will help in the selection of courses at the host university that compliment your UVic degree.
 - determine how many electives you have available to you (most students take electives on exchange).
- Host university course catalogue/academic calendar found online
 - use the current course information available. Please keep in mind that course availability may change between now and the start of your exchange term. You should be prepared to adjust your courses and expectations accordingly.

After you have been accepted into the ICS Exchange Program, you will have the chance to submit prospective host university courses for evaluation by UVic. The results will indicate how many UVic units each course is worth, as well as the course equivalency at the host university.
