

How to disable Touch Bar functionality by expanding the Control Strip on the MacBook Pro

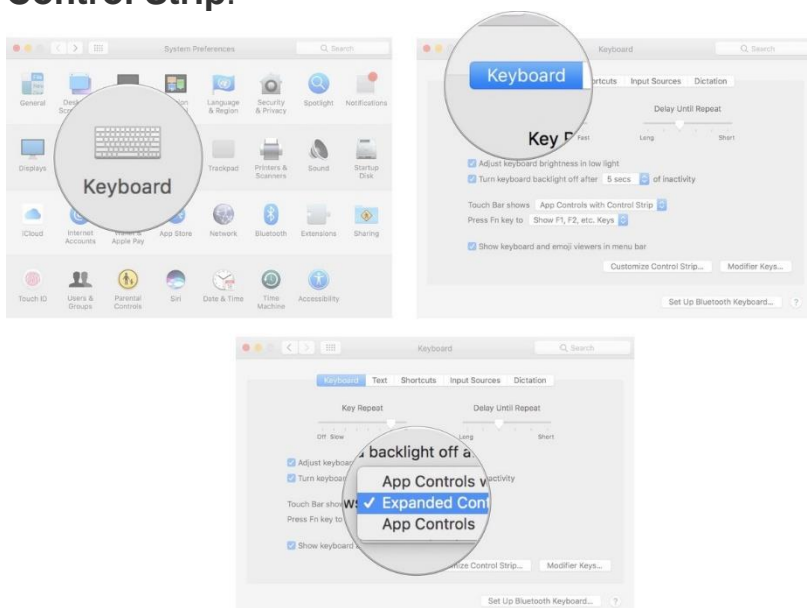

These are the steps you are required to take prior to writing any law school exam using Exam4 in CLOSED mode on a MacBook Pro with a Touch Bar.

You can find the Keyboard settings by searching in **Spotlight**, or manually access them via System Preferences.

1. Click on the **Apple menu** icon in the upper left corner of the screen.
2. Click on **System Preferences** in the drop down menu.

3. Click on **Keyboard**.
4. Click on the **Keyboard** tab.
5. Under *Touch Bar Shows*, click the drop down menu and select **Expanded Control Strip**.

This will set the Touch Bar to only show the Control Strip tools, no matter what app you are using.
