

## ENVIRONMENTAL ENRICHMENT OPTIONS

PI:	RESEARCHER:	PROTOCOL #:	
Species:		DATE:	
<b>Standard in all cages:</b> (unless specified in protocol) – with <b>no</b> additional charges		<b>Standard</b>	
<p><b>Nestlet:</b>            Nesting material            Aids in thermoregulation            Offers enrichment for multiple animals in cage            Allows for tunneling and foraging            Chemically inert, odorless and non-ingestible            Made of pulped virgin cotton fiber            Portion controlled – 22" x 12" x 12"            Autoclavable</p>		<b>Standard</b>	
<p><b>Igloos:</b>            Provides shelter and a secluded place to build a nest            Transparent material provides ease of visibility            Made of high temp polycarbonate            Great addition to breeding programs            Autoclavable</p>		<b>Standard</b>	
<p><b>Paper huts:</b>            Provides sheltering and nesting opportunities            low profile (2½" tall)            Made of non-recycled, 100% virgin wood pulp            Autoclavable</p>		<b>Standard</b>	
<b>Enrichment Available – with no additional charges:</b>		<b>Allowed</b>	<b>Not Allowed</b>
<p><b>Crinkle Paper:</b>            Aids in thermoregulation            Offers enrichment for multiple animals in cage            Allows for tunneling and foraging            Made of 100% virgin kraft paper            Portion controlled – 4 or 8 gram pucks            Irradiated</p>		<input type="checkbox"/>	<input type="checkbox"/>
<p><b>Nesting Sheets:</b>            Lint free sheets do not cause eye irritation            alternative to cotton nesting material            Encourages natural nest building behavior            Made of 100% virgin wood pulp            Autoclavable</p>		<input type="checkbox"/>	<input type="checkbox"/>
<p><b>Running Wheel:</b>            Activity wheel for use with the Mouse Igloo            Supports natural and instinctive running behavior            Benefits mice with stereotypic behaviour – i.e. food shredders            Made of high temp polycarbonate            Autoclavable</p>		<input type="checkbox"/>	<input type="checkbox"/>
<p><b>Mouse Tunnels:</b>            Offers rodents shelter and security            Transparency makes routine cage checks easy and fast            Helps reduce boredom and aggressive behaviour            Made of high temp polycarbonate            Optional: trapeze tunnel - increase physical activity and usable floor space,            suspend from cage with a stainless steel hanger            Autoclavable</p>		<input type="checkbox"/> Tunnel only	<input type="checkbox"/> Tunnel only
		<input type="checkbox"/> Optional trapeze	<input type="checkbox"/> Optional trapeze

<b>PI:</b>	<b>Researcher:</b>	<b>Protocol #:</b>	<b>Date:</b>
<b>Species:</b>			

<b>Enrichment Available with no additional charges:</b>		<b>Allowed</b>	<b>Not Allowed</b>
<b>Cardboard tunnels:</b> Sheltering, nesting and gnawing enrichment Helps reduce boredom and aggressive behavior Made of 100% recycled pulp paper Increases physical activity Disposable Not autoclavable contains adhesives Available sterile by gamma irradiation		<input type="checkbox"/>	<input type="checkbox"/>
<b>Wood Gnawing Blocks:</b> Made of high quality kiln dried hardwood Provides the most natural form of gnawing enrichment Cube shape reduces loss through cage floor Autoclavable		<input type="checkbox"/>	<input type="checkbox"/>
<b>Gnawing enrichment:</b> Provides gnawing enrichment for rodents Nylon bone made of pure virgin nylon Orange cone made of durable polyurethane Durable For exploratory behavior Autoclavable		<input type="checkbox"/>	<input type="checkbox"/>
<b>Climbing enrichment:</b> <b>Rattles(rabbit specific):</b> Clips onto cage wire lid Provides climbing opportunity Autoclavable		<input type="checkbox"/>	<input type="checkbox"/>

<b>Treats with no additional charges:</b>			
<b>Star puffs:</b> A low sugar, low calorie treat (< 1 kcal/puff) Delicious banana-flavored light crunchy puff Made with simple wholesome ingredients Excellent for reward or foraging opportunities		<input type="checkbox"/>	<input type="checkbox"/>
<b>Black Oil Sunflower seeds:</b> A healthy, natural foraging treat Excellent source of omega 6 essential fatty acids Excellent source of dietary fiber, protein and vitamin E Sterile Recommended for difficult breeders Helps to deter rodent cannibalism		<input type="checkbox"/>	<input type="checkbox"/>
<b>Supreme mini-treats:</b> Nutritionally complete 1 gm treat compliments enrichment programs Excellent for training, conditioning or as a reward following a less desirable procedure Helps to deter rodent maternal cannibalism; Excellent source of vitamin C Nutritionally Assayed		<input type="checkbox"/>	<input type="checkbox"/>
<b>Timothy Hay:</b> 100% natural sun-cured timothy hay Roughage aids in natural digestive process Use as a routine supplement for beneficial therapeutic effects Inexpensive and healthy enrichment for a variety of species Gamma irradiated to eliminate natural biological contaminants		<input type="checkbox"/>	<input type="checkbox"/>
