

## Transferring captured images from the FIB - Hitachi FB-2100

### On the IBM ThinkPad:

1. Login as “Elaine Humphrey”, password is blank
2. From the start menu, select **WinSCP**.
3. From the **WinSCP Login** dialog box, select **FB-2100**, and click **Login**. This profile is configured with the correct username, password, and directory path.
4. You are now viewing the TIFF folder on the FB-2100 via SCP protocol. Find your TIFF file in this directory, and drag/drop it to a directory on the Thinkpad.
5. Copy files to a memory stick, and you’re done.
