The world looks different from here.

University
of Victoria

A monthly Lunch & Learn Series to help students at the Gustavson School of Business gain deeper understanding of cultural complexity in today's global workplace. Each session will feature a distinct national culture prominent in the global workplace and provide a snapshot of the key cultural axioms that influence common work processes in the given national culture. This starting point will help students expand their thinking and behaviour to include multiple perspectives on the cultural environment of work. A panel of MBA students from the focus country will then provide insights from their "up close and personal" points of view. Ample time will be provided for Q&A and networking.
