The spouses of members are split up, constitutionally, into two group types: spousal, when the member is alive, and associate, when the member is deceased.

In the past, the AGM reports included both group types under the spousal group type. For this fiscal year, only the spouses whose member spouses are alive are

shown in the spousal group type. The spouses whose member spouses are deceased are in the associate group type.

The associate group type contains 21 members whose spouses are deceased, and 53 members who retired from an institution of higher learning other than UVic, for a total of 74 associates.

All the present associate spouses have assumed the memberships of a lifelong member.

**NOTE #3:**

Eight of the 28 annual members did not renew their membership for fiscal 2026-2027. Of the 20 active annual members, 16 paid their due for one year and 4 took advantage of the multi-year discount.
