BIOC102
Biochemistry and Human Health
CRN 20207
Winter 2016

Class time/location: Tues., Wed., Fri., 1:30 – 2:20, HSD A240

Instructor: Dr. Doug Briant
Office hours: TBA
Room:Petch 227
e-mail: dbriant@uvic.ca
Instructor: Dr. Marty Boulanger
Office hours: TBA
Room: Petch 220
e-mail: mboulang@uvic.ca

Textbook: Since the course material is compiled from a large number of sources, including current stories in the news, there is no course textbook. Much of the source material (papers) will be provided on-line in the CourseSpaces site, and will serve as an additional resource. You will need your UVic NetLink ID and password to access this information.

Lecture Notes: Notes will generally be made available on the CourseSpaces site prior to lectures. Notes are arranged by topic, and a single topic may span multiple lectures. ***Lecture notes are not complete***, and students will be responsible for all materials covered in the lectures.

BIOC102 course learning objectives:

This course will introduce students to the basic components and processes underlying human life. We will discuss how diseases arise when these processes are disturbed, and how drugs work to combat disease. Additionally, students will be introduced to scientific method, experimental design and critical examination of scientific results. By the end of the course, students will have sufficient knowledge to understand and analyze health science publications from the mainstream media.

Important dates and evaluation:

EVALUATION	Date
Dr. Doug Briant's Section, starting January 5	
20% test 1	***in class*** Tuesday, January 26
20% test 2	***in class*** Wednesday, February 24
10% group projects	***two projects, attendance in class MANDATORY, submission IN CLASS*** Friday, January 22 Tuesday, February 16
Dr. Marty Boulanger's Section, starting February 26	
20% Test	***in class*** Friday, March 18
15% in class presentation	Week of March 29
15% group research paper	Due Monday, April 01

- Students are responsible for ensuring that they are properly registered in the course.
- Students are expected to have met all pre/co-requisites for the course (see above).

Grading:

A+	90 -100	**B+**	77 - 79	**C+**	65 - 69	**F**	< 50
A	85 - 89	**B**	73 - 76	**C**	60 - 64	**N ****	< 50
A-	80 - 84	**B-**	70 - 72	**D**	50 - 59		

** N grades

Students who have completed the following elements will be considered to have completed the course and will be assigned a final grade:

- ***Both tests and the research paper must be completed to complete the course***

Failure to complete one or more of these elements will result in a grade of "N" regardless of the cumulative percentage on other elements of the course. An N is a failing grade, and it factors into a student's GPA as 0. The maximum percentage that can accompany an N on a student's transcript is 49

Topics:

	topic	comments
	Dr. Doug Briant. starting Jan. 05	
1	***Introduction***	What is biochemistry?
2	***Biomolecules***	Introduction to the major building blocks of cells
3	***Scientific Method***	How scientists approach a problem, and some of the common mistakes made in scientific research
4	***Metabolism 101***	How humans break down molecules to get energy and build new molecules. Introduction to diseases associated with metabolism.
5	***Microbiology and Pathogenesis***	Introduction to bacteria. We will learn about both beneficial and harmful bacteria. Introduction to how bacteria causes disease. ***Guest Lecturer Dr. Caroline Cameron***
6	***Cell Biology and Cancer***	Basic introduction into what cells are and how they function together in a human. We will look at how cellular defects can result in cancer. ***Guest Lecturer Dr. Perry Howard***
	Dr. Marty Boulanger. starting Feb. 26.	
7	***Biomolecular Imaging***	Mapping the three dimensional structures of biomolecules
8	***Epigenetics***	Moving beyond your genes. ***Guest Lecturer Dr. Ed Ishiguro***
9	***Drug Discovery and Development***	Next generation therapeutics. ***Guest Lecturer Dr. John Burke***
10	***Diagnostics and Vaccines***	Novel strategies to detect and prevent disease. ***Guest Lecturer Dr. Paul Romaniuk***
11	***Topics of Discussion***	Presented by the class. Dates and Topics to be announced

DEPARTMENT INFORMATION AND POLICIES

1. The Department of Biochemistry and Microbiology upholds and enforces the University's policies on academic integrity. These policies are described in the current University Calendar. All students are advised to read this section.

2. Cell phones, computers, and other electronic devices must be turned off at all times unless being used for a purpose relevant to the class. Students having a cell phone, tablet, or computer on their person during an exam will be assumed to have it for the purpose of cheating.

3. Any recordings of lectures may only be performed with written permission of the instructor, and are for personal use only. The instructor retains copyright to such recordings and all lecture materials provided for the class (electronic and otherwise); these materials must not be shared or reposted on the Internet.

4. Course materials, such as notes, problem sheets, quizzes, examinations, example sheets, or review sheets, may not be redistributed without the explicit written permission of the instructor.

5. Students are expected to be present for the midterm and final exams. Instructors may grant deferrals for midterm examinations for illness, accident, or family affliction, and students must provide appropriate documentation 48 hours after the midterm exam. The deferred exam must be written within five business days of the original exam. The Department of Biochemistry and Microbiology considers it a breach of academic integrity for a student taking a deferred examination to discuss the exam with classmates. Similarly, students who reveal the contents of an examination to students taking a deferred examination are considered to be in violation of the University of Victoria policy on academic integrity (see current University Calendar). Deferral of a final exam must be requested with an Academic Concession form and submitted directly to Undergraduate Records. Deferred final exams for fall term courses will be arranged by the instructor. Deferred final exams for spring term courses will be arranged through Undergraduate Records and must be written before the end of the summer term as stipulated in the University Calendar.

6. Multiple choice scan sheets for machine scoring (bubble sheets) are considered the authentic exam answer paper and will be retained by the department for 1 year.

7. Professors may refuse to review/remark exams not written in indelible ink. In addition, requests for review/remark of a midterm exam must be made within one week of the exam being returned. Students are expected to promptly pick up midterm exams after marking has been completed, either in class or from the instructor.

8. Examination papers that have pages removed, or are mutilated will not be marked.

9. I reserve the right to use plagiarism detection software or other platforms to assess the integrity of student work."

Resource Centre for Students with a Disability

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, approach the Resource Centre for Students with a Disability (RCSD) as soon as possible (http://rcsd.uvic.ca/.) in order to assess your specific needs

Course Experience Survey (CES)

We value your feedback on this course. Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to us regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. We will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.
