

**BIOC102**  
**Biochemistry and Human Health**  
**CRN 20207**  
**Winter 2016**

**Class time/location:** Tues., Wed., Fri., 1:30 – 2:20, HSD A240

**Instructor:** Dr. Doug Briant

**Office hours:** TBA

**Room:** Petch 227

**e-mail:** dbriant@uvic.ca

**Instructor:** Dr. Perry Howard

**Office hours:** Tues., Fri., 2:30-3:30

**Room:** Petch 207

**e-mail:** phoward@uvic.ca

**Textbook:** Since the course material is compiled from a large number of sources, including current stories in the news, there is no course textbook. Links to the source material (papers) will be provided on-line in the CourseSpaces site, and will serve as an additional resource. You will need your UVic NetLink ID and password to access this information.

**Lecture Notes:** Notes will generally be made available on the CourseSpaces site prior to lectures. Notes are arranged by topic, and a single topic may span multiple lectures. ***Lecture notes are not complete***, and students will be responsible for all materials covered in the lectures.

**BIOC102 course learning objectives:**

This course will introduce students to the basic components and processes underlying human life. We will discuss how diseases arise when these processes are disturbed, and how drugs work to combat disease. Additionally, students will be introduced to scientific method, experimental design and critical examination of scientific results. By the end of the course, students will have sufficient knowledge to understand and analyze health science publications from the mainstream media.

**Important dates and evaluation:**

EVALUATION	Date
<b><i>Dr. Doug Briant's Section, starting January 4</i></b>	
30% test 1	<i>In class Tuesday January 31</i>
5% group project	<i>In class Wednesday, February 01</i>
<b><i>Dr. Howard's Section, starting February 03</i></b>	
25% test 2	<i>In class Friday February 24</i>
5% group project	<i>In class March 10</i>
25% test 3	<i>In class March 17</i>
10% test 4	<i>In class April 4</i>

- Students are responsible for ensuring that they are properly registered in the course.

**Grading:**

<b>A<sup>+</sup></b>	90 -100	<b>B<sup>+</sup></b>	77 - 79	<b>C<sup>+</sup></b>	65 - 69	<b>F</b>	< 50
<b>A</b>	85 - 89	<b>B</b>	73 - 76	<b>C</b>	60 - 64	<b>N **</b>	< 50
<b>A<sup>-</sup></b>	80 - 84	<b>B<sup>-</sup></b>	70 - 72	<b>D</b>	50 - 59		

**\*\*\_N grades**

Students who have completed the following elements will be considered to have completed the course and will be assigned a final grade:

- ***Students must have written 3 of 4 tests to complete the course.***

Failure to complete this minimum requirement will result in a grade of "N" regardless of the cumulative percentage on the completed elements of the course. An N is a failing grade, and it factors into a student's GPA as 0. The maximum percentage that can accompany an N on a student's transcript is 49.

Topics:

	<i>topic</i>	<i>comments</i>
<b>Dr. Doug Briant. starting Jan. 04</b>		
1	<b>Introduction</b>	What is biochemistry?
2	<b>Biomolecules</b>	Introduction to the major building blocks of cells
3	<b>Scientific Method</b>	How scientists approach a problem, and some of the common mistakes made in scientific research
4	<b>Microbiology and Pathogenesis</b>	Introduction to bacteria. We will learn about both beneficial and harmful bacteria. Introduction to how bacteria causes disease.
<b>Dr. Perry Howard. Starting Feb. 03.</b>		
5	<b>Cell Biology</b>	Introduction to cell biology
6	<b>Metabolism</b>	How humans break down molecules to get energy and build new molecules. Introduction to diseases associated with metabolism. The role of biochemistry in the discovery of vitamins and enzymes.
7	<b>Gene regulation</b>	Introduction to genes how they are regulated. What is epigenetics?
8	<b>Monogenetic traits</b>	Gene hunters: discovery of disease causing mutations. Gene therapy
9	<b>Complex diseases</b>	Determining the causes of complex, multi-factor diseases.
10	<b>Cancer Biology</b>	Will examine the cellular defects that lead to cancer and the basis of cancer therapies
11	<b>Personalized Medicine</b>	What is personalized medicine and what does it mean for the future of health care?

## **DEPARTMENT INFORMATION AND POLICIES**

1. The Department of Biochemistry and Microbiology upholds and enforces the University's policies on academic integrity. These policies are described in the current University Calendar. All students are advised to read this section.
2. Cell phones, computers, and other electronic devices must be turned off at all times unless being used for a purpose relevant to the class. Students having a cell phone, tablet, or computer on their person during an exam will be assumed to have it for the purpose of cheating.
3. Any recordings of lectures may only be performed with written permission of the instructor, and are for personal use only. The instructor retains copyright to such recordings and all lecture materials provided for the class (electronic and otherwise); these materials must not be shared or reposted on the Internet.
4. Course materials, such as notes, problem sheets, quizzes, examinations, example sheets, or review sheets, may not be redistributed without the explicit written permission of the instructor.
5. Students are expected to be present for the midterm and final exams. Instructors may grant deferrals for midterm examinations for illness, accident, or family affliction, and students must provide appropriate documentation 48 hours after the midterm exam. The deferred exam must be written within five business days of the original exam. The Department of Biochemistry and Microbiology considers it a breach of academic integrity for a student taking a deferred examination to discuss the exam with classmates. Similarly, students who reveal the contents of an examination to students taking a deferred examination are considered to be in violation of the University of Victoria policy on academic integrity (see current University Calendar). Deferral of a final exam must be requested with an Academic Concession form and submitted directly to Undergraduate Records. Deferred final exams for fall term courses will be arranged by the instructor. Deferred final exams for spring term courses will be arranged through Undergraduate Records and must be written before the end of the summer term as stipulated in the University Calendar.
6. Multiple choice scan sheets for machine scoring (bubble sheets) are considered the authentic exam answer paper and will be retained by the department for 1 year.
7. Professors may refuse to review/remark exams not written in indelible ink. In addition, requests for review/remark of a midterm exam must be made within one week of the exam being returned. Students are expected to promptly pick up midterm exams after marking has been completed, either in class or from the instructor.
8. Examination papers that have pages removed, or are mutilated will not be marked.
9. I reserve the right to use plagiarism detection software or other platforms to assess the integrity of student work."

### **Resource Centre for Students with a Disability**

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a disability/health consideration that may require accommodations, approach the Resource Centre for Students with a Disability (RCSD) as soon as possible ([http://rcsd.uvic.ca/.](http://rcsd.uvic.ca/)) in order to assess your specific needs

### **Course Experience Survey (CES)**

We value your feedback on this course. Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to us regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. We will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.
