Instructors: Derek Smith, Christoph Borchers, Andrew Ross, Terry Pearson, Morteza Razavi, Jason Serpa, Caroline Cameron, Leigh-Anne Swayne

Co-ordinator: Terry Pearson
Office: Petch 250
Phone: 721-7080
Email: parasite@uvic.ca
Textbook: none required

Part I  INTRODUCTION TO MASS SPECTROMETRY (22 hours)
(Derek Smith, Christoph Borchers, Andrew Ross)

Introduction to mass spectrometry for biological applications. Topics will include system architecture and analytical strategies for the detection, characterization, and quantitation of proteins and the identification and localization of protein post-translational modifications.

Midterm Exam  Friday February 20

Part II  IMMUNOPROTEOMICS (6 Hours)
(Terry Pearson and Morteza Razavi)

Use of antibodies coupled with mass spectrometry to measure proteins in complex biological systems (6 hours)
Antibodies and other protein/peptide binders for sample enrichment. Top-down and bottom-up immuno-MS methods. SISCAPA methods applied to biomarker validation and clinical assay development

Part III  APPLICATION OF PROTEOMICS METHODS TO BIOLOGICAL PROBLEMS (8 hours)
(Jason Serpa, Caroline Cameron and Leigh-Anne Swayne)

- Using proteomic methodologies to investigate bacterial pathogenesis.
- Using proteomic methodologies to study ion channel signalling networks and dynamic biological systems.

**GRADING SCHEME**

**Assessment of Student Performance**

Marking of short answer, true-false and multiple choice exam questions on material presented in the course and assignment of a numerical mark to each question.

**Evaluation of the Exams and Weighting**

<table>
<thead>
<tr>
<th>Exam Type</th>
<th>Weighting</th>

<tr>
<td>Final exam</td>
<td>60%</td>
</tr>
</tbody>
</table>

**Grading Scheme**

- A+ 90 -100
- A  85 - 89
- A- 80 - 84
- B+ 77 - 79
- B  73 - 76
- B- 70 - 72
- C+ 65 - 69
- C  60 - 64
- D  50 - 59
- F  < 50
- N** < 50

**N grades**

Students who have completed Pre-midterm quiz, the midterm exam and the final exam will be considered to have completed the course and will be assigned a final grade. Failure to complete one or more of these elements will result in a grade of "N" regardless of the cumulative percentage on other elements of the course. An N is a failing grade, and it factors into a student’s GPA as 0. The maximum percentage that can accompany an N on a student’s transcript is 49.

**DEPARTMENT INFORMATION AND POLICIES**

1. The Department of Biochemistry and Microbiology upholds and enforces the University’s policies on academic integrity. These policies are described in the current University Calendar. All students are advised to read this section.

2. Cell phones, computers, and other electronic devices must be turned off at all times unless being used for a purpose relevant to the class. Students having a cell phone, tablet, or computer on their person during an exam will be assumed to have it for the purpose of cheating.

3. Any recordings of lectures may only be performed with written permission of the instructor, and are for personal use only. The instructor retains copyright to such recordings and all lecture materials provided for the class (electronic and otherwise); these materials must not be shared or reposted on the Internet.

4. Students are expected to be present for the midterm and final exams. Instructors may grant deferrals for midterm examinations for illness, accident, or family affliction, and students must provide appropriate documentation 48 hours after the midterm
exam. The Department of Biochemistry and Microbiology considers it a breach of academic integrity for a student taking a deferred examination to discuss the exam with classmates. Similarly, students who reveal the contents of an examination to students taking a deferred examination are considered to be in violation of the University of Victoria policy on academic integrity (see current University Calendar). Deferral of a final exam must be requested with an Academic Concession form and submitted directly to Undergraduate Records. Deferred final exams for fall term courses will be arranged by the instructor. Deferred final exams for spring term courses will be arranged through Undergraduate Records and must be written before the end of the summer term as stipulated in the University Calendar.

5. Scan sheets for multiple choice exams (bubble sheets) will not be made available for review. Therefore, in addition to filling in answers on the scan sheet, students should also circle their answers in ink on their exam.

6. Professors may refuse to review/remark exams not written in ink. In addition, requests for review/remark of a midterm exam must be made within one week of the exam being returned. Students are expected to promptly pick up midterm exams after marking has been completed, either in class or from the instructor.

7. Examination papers that have pages removed, or are mutilated will not be graded.

Course Experience Survey (CES)

We value your feedback on this course. Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to us regarding the course and our teaching, and to help the Department of Biochemistry and Microbiology improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. We will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.
