

Alan Astbury Public Lecture Series

From Einstein to Gravitational Waves and Beyond

Dr. Barry Barish

Linde Professor of
Physics, emeritus

California Institute
of Technology

Thursday, May 4

7:30 pm

Bob Wright Centre, B150

Presented by the **Department of Physics and Astronomy**

Einstein predicted the existence of gravitational waves one hundred years ago. They have been recently observed from pairs of merging Black Holes by the Laser Interferometer Gravitational-wave Observatory (LIGO). The physics of gravitational waves, the detection technique, the observations, including latest results, and implications will all be discussed.

This free event has limited seating. To reserve your seats:
