24 Mar 2021	<i>Pending</i>	<i>Pending</i>
31 Mar 2021	Dr. Michael Ekers	Tremulous 'Forestry Property': The Longue Durée of the Esquimalt and Nanaimo Land Grants as Colonial Enclosures
7 Apr 2021	Various	501/601 Presentations

You are invited to attend ES's Research Colloquium! This year, we are hosting the seminar online via Zoom. Please contact Nicole Boucher (nicoleboucher@uvic.ca) for the login credentials. This login information will allow you access to the entire Winter seminar series.

If you have not already used Zoom, you can log in to the meeting by either installing the Zoom app, or by logging in directly to the Zoom webpage: <https://zoom.us/join>. Please be sure to join the meeting early, to ensure any technical issues can be resolved. You may find trouble-shooting solutions here if you run into issues: <https://support.zoom.us/hc/en-us/sections/200305593-Troubleshooting>. When you enter the meeting, your microphone, by default, will be turned off and controlled by the moderator. Your camera will be on, and if you are comfortable you can leave it on. It will be nice to see some familiar and new faces!

At the beginning of each talk, one or two graduate student hosts will do a territorial land acknowledgement, and then introduce the speaker. After the speaker has finished, we will ask the new cohort of ES grad students, who will be together in a UVic lecture hall, for their questions. And if time permits, we will open questions up to the online audience more broadly. You can type your questions into the Zoom chat throughout the talk, but please do reserve the chat function strictly for your questions (or to connect with the moderators if there is a security issue), and not for side conversations. A moderator will call upon you at the end of the talk if your question is selected, and they will unmute you.
