Sustainable Ecology in High Amazon Peru
Pre-Columbian Indigenous Permaculture

WHAT: Learn ancient permacultural soil-building and farming practices in Peru, while living and working with the indigenous Kichwan community in a safe and vibrant research center in the High Amazon region of Peru. This program is half seminar and half hands-on field work. Designed for students interested in ecology, environmental studies, organic farming, indigeneity, Latin American studies, and sustainability.

WHEN: The program runs for the full month of May in 2016
Register NOW! until February 2016

WHO: Open to students from UVIC, UBC, and U of A.

Instructors: Prof. Frederique Apffel-Marglin and Prof. Jeremy L. Caradonna.

Credits: 72-credit hours (3 or 6 credit equivalency of transfer credit, depending on the school)

Cost: US $1,900 (includes all course fees, lodging, 3 daily meals, & ground transportation)

Contact: caradonn@uvic.ca
