

PhD position in the Socio-Ecological Landscapes Lab starting May or September 2025!

Come join the Socio-Ecological Landscapes Lab at the University of Victoria!

The proposed project will investigate current and historical alpine plant community composition in the southwest Coast Mountains under the supervision of Dr. Boulanger-Lapointe, Dept. of Geography, and co-supervision of Dr. Higgs, School of Environmental Studies. The research will involve extensive field work in the alpine to conduct vegetation surveys as well as historical and repeat photographs and remote sensing analyses back in the lab. This position is part of a large interdisciplinary research initiative conducted in collaboration with local partners to identify ecosystems most vulnerable to recreational activities and climate change.

Competitive candidates will have skills and experience in both computational solutions and field ecology; strong statistical and modelling skills; training and interest in shifting dynamics of ecosystems under climate and other environmental changes; and excellent interpersonal and writing abilities. Experience working with Indigenous partners and local stakeholders will be considered an asset.

The Socio-Ecological Landscapes Lab values diversity and seeks to build an inclusive environment. The candidate would hold a senior role in the lab and will be expected to contribute to a welcoming and inclusive atmosphere. International students and those from groups that are under-represented in ecology are encouraged to apply, including those with disabilities.

Compensation: We offer \$40,000 per year for four years as part of a portfolio of funding sources; grant, departmental stipends and TAs. It is expected that successful applicants will be competitive for and apply for external scholarships and fellowship (e.g., NSERC CGS-D).

How to Apply: To express your interest, get more information, or ask questions, please email your CV, academic transcript(s), and a cover letter (ideally as a single PDF file) that includes a short description of your research interests and background and a note about your career goals to nboulangerlapointe AT uvic.ca with the title "PhD position". Review of applications will begin on January 6, 2025, and continue until the position is filled. If the position is still listed on this site, we are still accepting applications!
