

COURSE OUTLINE
Remote Sensing of Environment

Class Schedule: TW 9:30 – 10:20am
Class location: DSB C108
Office Hours: Wednesday 2.30pm – 3.30pm
Office Location: David Turpin B126
Contact: Maycira Costa

COURSE DESCRIPTION

This course introduces the basic physical principles of modern remote sensing. Emphasis is placed on the principles of interaction of energy with the atmosphere and Earth materials such as vegetation, soil, water, rock/minerals, and how to obtain and interpret imagery acquired by different satellites. We focus on the optical and thermal part of the spectra. This course builds on the fundamentals of remote sensing and imagery processing introduced in GEOG228.

KEY THEMES: satellite imagery, radiation, optical, thermal, earth' surface

LEARNING OUTCOMES

1. To obtain an understanding on how remote sensing can be used to extract information about the earth 's surface
2. To be able to explain how optical radiation interacts with the earth's surface
3. To be able to find and download imagery acquired by different satellites
4. To learn modern remote sensing technology
5. To be able to explain how satellite imagery can be used for time-series analysis
6. To be able to explain how satellite imagery can be used to derive biogeophysical variables

EVALUATION

Exam 1: 20%
Exam 2: 25%
Exam 3: 15%
Lab 1: 8%
Lab 2: 8%
Lab 3: 8%
Lab 4: 8%
Lab 5: 8%

GRADING SYSTEM

As per the Academic Calendar:

Grade	Grade point value	Grade scale	Description
A+ A A-	9 8 7	90-100% 85-89% 80-84%	Exceptional, outstanding and excellent performance. Normally achieved by a minority of students. These grades indicate a student who is self-initiating, exceeds expectation and has an insightful grasp of the subject matter.
B+ B B-	6 5 4	77-79% 73-76% 70-72%	Very good, good and solid performance. Normally achieved by the largest number of students. These grades indicate a good grasp of the subject matter or excellent grasp in one area balanced with satisfactory grasp in the other area.
C+ C	3 2	65-69% 60-64%	Satisfactory, or minimally satisfactory. These grades indicate a satisfactory performance and knowledge of the subject matter.
D	1	50-59%	Marginal Performance. A student receiving this grade demonstrated a superficial grasp of the subject matter.
F	0	0-49%	Unsatisfactory performance. Wrote final examination and completed course requirements; no supplemental.
N	0	0-49%	Did not write examination or complete course requirements by the end of term or session; no supplemental.

GEOGRAPHY DEPARTMENT INFO

- Undergraduate Advisor: Dr. Phil Wakefield – geogadvisor@uvic.ca

COURSESPACES

POLICY ON LATE ASSIGNMENTS

The penalty for assignments handed in late is **20% per day**, every 24 hour period. **Failure to submit a lab assignment will result in a failing grade of incomplete (N)**. Exceptions will only be granted for medical reasons (requiring a written report from a medical practitioner stating your

inability to attend class) or extreme personal crises. Only the course instructor can grant exceptions. Please do not try to negotiate exceptions with the TA.

PLAGIARISM

Please see: <http://www.uvic.ca/learningandteaching/students/resources/expectations/>
Policy on Academic Integrity: <http://web.uvic.ca/calendar2015-01/FACS/UnIn/UARe/PoAcl.html>

ACCESSIBILITY

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a documented disability/health consideration that may require accommodations, please feel free to approach me and/or the Resource Centre for Students with a Disability (RCSD) as soon as possible. The RCSD staff are available by appointment to assess specific needs, provide referrals and arrange appropriate accommodations <http://rcsd.uvic.ca/>. The sooner you let us know your needs, the quicker we can assist you in achieving your learning goals in this course.

POSITIVITY AND SAFETY

The University of Victoria is committed to promoting, providing and protecting a positive and safe learning and working environment for all its members.

Course Experience Survey (CES)

I value your feedback on this course. Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to me regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. I will remind you and provide you with more detailed information nearer the time, but please be thinking about this important activity during the course.

Cell phones

Must be off or in silent mode during lectures. Computers must be used to facilitate learning only. Recording of lectures is strictly prohibited.

Tentative Course Schedule

WEEK	DATE	Topic
1	Sept 5	Goals and structure of the course. Remote sensing of the environment; Sensors/satellites characteristics
2	Sept 11,12	Electromagnetic radiation - principles
3	Sept 18, 19	Atmospheric attenuation
4	Sept 25, 26	Atmospheric correction, Vegetation
5	Oct 2,3	Vegetation
6	Oct 9,10	Vegetation/Water
7	Oct 16, 17	Water/MIDTERM 1

8	Oct 23, 24	Water
9	Oct 30, 31	Thermal
10	Nov 6, 7	Thermal/ <i>MIDTERM 2</i>
11	Nov 13, 14	<i>Reading break</i>
12	Nov 27, 28	Soils, Minerals
13	Dec 4, 5	Review/ <i>Final EXAM</i>

Recommended Text book: (I will leave a copy with the library)

Jensen, J.R. (2007). Remote Sensing of the Environment: Pearson New International Edition: An Earth Resource Perspective, 2014. Ebook. This is a cheaper version (I have not used it)

Notes

1. I reserve the right to make changes to the schedule.
2. The best way to reach me is during office hours. Do not expect immediate e-mail replies, so **plan ahead**.
3. **If you have ANY concerns related to lectures and labs, please come see me as soon as possible.**
