COURSE DESCRIPTION
This course introduces students to a variety of spatial analysis techniques that can be used for understanding geographic phenomena. Topics covered in this course include descriptive spatial analysis, spatial sampling, inferential spatial analysis, and spatial interpolation. Lectures focus on the geographic theory and equations behind each method, while labs provide an opportunity for students to implement a variety of techniques to address questions that are geographic in nature. All labs and exercises are completed using the scientific programming language R. Students who successfully complete this course will not only have more analytical tools at their disposal, but will also become versed in spatial analysis discourse, which will allow them to interrogate scientific research employing a range of spatial analytical approaches.

KEY THEMES: Spatial analysis, statistics, programming, communicating science

REQUIRED TEXTS
All readings are provided each week on Brightspace
Course requires multiple software: Kritik Peer Assessment Tool ($24); R and R Studio; Brightspace

LEARNING OUTCOMES

• Define appropriate spatial analysis methods needed for specific geographical questions.
• Analyze geographic data to characterize spatial patterns of observations and spatial relationships between variables.
• Analyze and interpolate spatial data in order to create continuous surfaces.
• Demonstrate the ability to implement a suitable spatial analytical workflow for providing answers to geographic questions.
• Demonstrate proficiency in using the scientific programming language R to conduct spatial analysis.
• Demonstrate familiarity with spatial analysis language in order to effectively interrogate scientific research employing relevant methods.

POLICY ON LATE ASSIGNMENTS
Assignments will be accepted one day (24 hours) past the due date accompanied with a 10% late penalty. Assignments will not be accepted after this time, but students will still be able to obtain a grade if they participate in the peer assessment portion of the assignment.
ACADEMIC INTEGRITY
It is every student’s responsibility to be aware of the university’s policies on academic integrity, including policies on cheating, plagiarism, unauthorized use of an editor, multiple submission, and aiding others to cheat.

SEXUALIZED VIOLENCE PREVENTION AND RESPONSE AT UVIC
UVic takes sexualized violence seriously, and has raised the bar for what is considered acceptable behaviour. We encourage students to learn more about how the university defines sexualized violence and its overall approach by visiting uvic.ca/svp. If you or someone you know has been impacted by sexualized violence and needs information, advice, and/or support please contact the sexualized violence resource office in Equity and Human Rights (EQHR). Whether or not you have been directly impacted, if you want to take part in the important prevention work taking place on campus, you can also reach out:

COURSE EXPERIENCE SURVEY (CES)
I value your feedback on this course. Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to me regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. I will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.
