Course Objectives
This course will introduce you to some of the most widely used methods for summarizing and analyzing different types of data. The main objectives of this course are to provide you with the skills for:
• Organizing and describing data in an informative way;
• Drawing inferences and constructing convincing arguments based on data analysis;
• Evaluating arguments based on data analysis that appear in the geographic literature as well as the media.

Learning Outcomes
• Ability to calculate and interpret basic quantitative statistical measures and tests;
• Ability to apply both the statistical methods and software skills in a variety of settings.

Late Assignment Policy
Lab assignments are due at the beginning of the following lab. Penalty for assignments handed in more than 24 hours late is 10% of the value of the assignment. Assignments that are one week late will not be graded. Only the course instructor can grant exceptions.

Course Experience Survey (CES)
Towards the end of term, as in all other courses at UVic, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to me regarding the course and my teaching, as well as to help the department improve the overall programme for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. I will remind you and provide you with more detailed information as we approach the end of term.
