Course Overview
This course grapples with the daunting challenges facing contemporary cities and opportunities for promoting more sustainable paths forward. Blending theoretical reflection and practical case analysis of innovative, local and international sustainability projects, we explore how we might create vibrant places that would allow us to live, get around, build, work, and engage with others in socio-culturally, economically, and ecologically responsible and regenerative ways. In the midst of great pessimism, the course takes a critically optimistic tone, focusing on creative visioning and marking out promising pathways to a brighter future while recognizing the significant barriers in the way. Beyond standard lectures, the course will be built around engaging group discussion, a careful read of two recent texts - “Sustainist Design Guide” and “Happy Cities”, guest speakers, field excursions, and provocative videos.

Assessment
1. Sustainist Design Quiz – (15%) Jan 19th
2. Sustainist Design Case Study Assignment (20%) In a small group you will research, and produce a short illustrated case study of a sustainability project based on the framework developed in the Sustainist Design text. Due Mar 28th
3. Happy City Seminar (20%) – With a partner you will lead a discussion focusing on a chapter from the text Happy City sometime during the 2nd half of the term.
4. Participation (20%) – consists of quality contributions to class discussion; participation in field excursions; and attending 2 relevant events during the term, writing up and submitting a short well-written overview of the event, what you learned and how it related to class.
5. Final Exam (25%) – Take home exam given on Mar 28th and due on April 4th.

Note on marks: A-level marks (80%+) reflect exceptional (beyond expectations), outstanding, or at least highly competent efforts. B+/B level marks (73-79%) reflect good or at least acceptable efforts (usually above the class average). B-/C+ level marks (65-72%) represent average efforts, showing some understanding but deficient in some way. C/D level marks (50-64%) represent passable but largely insufficient efforts, while F marks (<50%) represent failing the course.

Course readings
There are two mandatory course texts and additional readings will be posted on the CourseSpaces site. Reading - and engaging with the readings (highlighting, underlining, taking good notes etc.) – is essential for your enjoyment of and success in this course.

Notes on learning expectations

1. Think deeply about why you are here and what you want to get out of your experience at UVic in the short time you’ll be here. Use this time wisely to develop marketable skills and good habits - e.g. effective written, visual and oral communication, critical thinking*, problem solving, empathic listening, organization, perseverence, and initiative.

2. I consider such skill development and good habit formation as being at least as important as content mastery in this course. While I want you to learn important things about sustainable communities, I also want you to develop particular skills and habits. Keep in mind employers are much more concerned with your skills and habits than your marks. For example, communicating insightfully and persuasively about ecological and issues is absolutely critical for bringing positive change about.

3. Effective learning involves recognizing how the course material is directly relevant to your life – in this case how sustainability is not just some topic of scholarly consideration but intimately about your future on this planet.

4. *Note: critical thinking is often misrepresented as cynical, pessimistic, or “being against things”. In this class it should rather be understood in terms of healthy skepticism with received wisdom recognizing the world could / should be otherwise; ceaseless, piercing questioning of status quo “common sense”; trying to make important linkages and connections; recognizing and evaluating multiple perspectives and the values and assumptions underlying each (including our own); evaluating evidence and arguments (while recognizing power relations in knowledge claims), arriving at defensible positions on issues and working towards a more respectful, inclusive, just, and fair world (or country in this case).

Tentative Schedule

| Jan 3, 5, 9, 10, 12 | Introduction / A way into sustainable cities |
| Jan 16, 17, 19, 23, 24, 26, 30, 31, Feb 2, 6 | Sustainist Design |
| Feb 7, 9 | Happy City Intro |
| Feb 12-16 | Reading Week |
| Feb 27, 28, Mar 2, 6, 7, 9, 13, 14, 16, 20, 21, 23 | Happy City Seminars & Field Excursions |
| Mar 27, 28 | Wrap up |

Quiz Jan 19th

“The University of Victoria is committed to promoting, providing and protecting a positive and safe learning and working environment for all its members.”

I value your feedback on this course. Towards the end of term, you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is vital to providing feedback to me regarding the course and my teaching, as well as to help the department improve the overall program for students in the future. The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device. I will remind you and provide you with more detailed information nearer the time but please be thinking about this important activity during the course.

If you look at the science about what is happening on earth and aren’t pessimistic, you don’t understand the data. But if you meet the people who are working to restore this earth and the lives of the poor, and you aren’t optimistic, you haven’t got a pulse. What I see everywhere in the world are ordinary people willing to confront despair, power, and incalculable odds in order to restore some semblance of grace, justice, and beauty to this world.

- Paul Hawken
