COURSE OUTLINE

Applied Statistics for Geographers

In the Information Age, data is no longer scarce – it’s overpowering.

John Dillard
President Big Sky Consulting

**Lectures** Tuesdays, 2:30 pm – 4:20 pm (Clearihue C111) Basement.  
**Lab** Fridays 9:30-11:20 BEC Basement.

**Office Hours:** Monday 10-11 AM, 1:30-3:30 PM.  Thursday 10-11 AM, 1:30-3:30 PM

**Office Location:** Turpin B352

**Contact:** 250-721-7337  flaherty@mail.geog.uvic.ca

**COURSE DESCRIPTION**

From satellites continuously orbiting the globe, sensors placed on the ocean floor, social network sites like Facebook, from teams of students coring trees or conducting interviews in First Nations communities, data are being collected everywhere and all the time. While computers allow us to store massive amounts of data, statistical methods are essential to the process of extracting useful information. If your passion is the environment, statistics help us to understand the impacts of climate change on oceans, plant and animal ranges, and human health. If your passion is in public policy, statistics help to inform governments and non-governmental organizations about the effectiveness of government programmes such as poverty alleviation, community recycling, and opioid addiction reduction. In order to sort through and correctly interpret the wealth of data that are available, however, you need to understand the strengths and weaknesses of different statistical analysis tools.

**COURSE GOAL**

This course builds on the basic knowledge of descriptive and inferential statistics and probability theory acquired in Geography 226. It aims to make students more knowledgeable practitioners, consumers, and evaluators of physical and social science data and research. This course will cover a breadth of tools that will help you design effective studies, make inferences from raw data, and translate those inferences into meaningful contexts.
LEARNING OUTCOMES

By the end of this course students will:

1. Be able to describe the goals of various statistical methodologies conceptually.
2. Have a greater appreciation of the value of statistical techniques in the context of everyday life and further studies.
3. Be able to select the appropriate statistical tools to analyze a particular problem
4. Be able to communicate the results of statistical analyses effectively both orally and in writing.
5. Be able to apply a healthy scepticism to statistical findings published in the scientific and gray literature based on a critical consideration of the techniques employed.

COURSE TOPICS

The primary focus of this course is on parametric statistics. A few non-parametric methods will also be examined to as to illustrate that alternatives may be available if the assumptions of parametric methods cannot be met. Some methods covered in Geography 226 will be reviewed so as to set the stage for examining new methods.

1. Analysis of Means – Arithmetic, Geometric and Harmonic means
   - Two Sample t-test, Mann Whitney U
   - One Way ANOVA, Kruskal-Wallis ANOVA
   - Paired t-test, Repeated Measures ANOVA
   - Two Way ANOVA

2. Correlation
   - bivariate and partial

3. Regression
   - Simple linear
   - Dummy variables
   - Modelling departures from a straight line
   - Multiple regression – model building, multicollinearity, heteroscedasticity.

4. Logistic Regression – Binary

5. Principal Components and/or Cluster Analysis

EVALUATION

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lab Exercises</td>
<td>40% (8 in total)</td>
</tr>
<tr>
<td>Research Paper</td>
<td>25% + Class Presentation 5%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>30% (two hour period)</td>
</tr>
</tbody>
</table>
GRADING SYSTEM

As per the Academic Calendar:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade point value</th>
<th>Grade scale</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>9</td>
<td>90-100%</td>
<td>Exceptional, outstanding and excellent performance. Normally achieved by a minority of excellent students. These grades indicate a student who is self-initiating, exceeds expectations and has an insightful grasp of the subject matter.</td>
</tr>
<tr>
<td>A</td>
<td>8</td>
<td>85-89%</td>
<td></td>
</tr>
<tr>
<td>A-</td>
<td>7</td>
<td>80-84%</td>
<td></td>
</tr>
<tr>
<td>B+</td>
<td>6</td>
<td>77-79%</td>
<td>Very good, good and solid performance. Normally achieved by the largest number of students. These grades indicate a good grasp of the subject matter or excellent grasp in one area balanced with satisfactory grasp in the other area.</td>
</tr>
<tr>
<td>B</td>
<td>5</td>
<td>73-76%</td>
<td></td>
</tr>
<tr>
<td>B-</td>
<td>4</td>
<td>70-72%</td>
<td></td>
</tr>
<tr>
<td>C+</td>
<td>3</td>
<td>65-69%</td>
<td>Satisfactory, or minimally satisfactory. These grades indicate a satisfactory performance and knowledge of the subject matter.</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
<td>60-64%</td>
<td></td>
</tr>
<tr>
<td>D</td>
<td>1</td>
<td>50-59%</td>
<td>Marginal Performance. A student receiving this grade demonstrated a superficial grasp of the subject matter.</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
<td>0-49%</td>
<td>Unsatisfactory performance. Wrote final examination and completed course requirements; no supplemental.</td>
</tr>
<tr>
<td>N</td>
<td>0</td>
<td>0-49%</td>
<td>Did not write examination or complete course requirements by the end of term or session; no supplemental.</td>
</tr>
</tbody>
</table>

GEOGRAPHY DEPARTMENT INFO

- Geography Department website: http://geog.uvic.ca
- Undergraduate Advisor: Dr. Phil Wakefield – geogadvisor@uvic.ca

COURSES

Lab assignments, data sets, suggested readings and lecture notes are available.
POLICY ON LATE ASSIGNMENTS

Lab assignments are due at the beginning of the following lab. Penalty for assignments handed in more than 24 hours late is 10% of the value of the assignment. Assignments that are one week late will not be graded. Only the course instructor can grant exceptions.

ACADEMIC INTEGRITY

It is every student’s responsibility to be aware of the university’s policies on academic integrity, including policies on cheating, plagiarism, unauthorized use of an editor, multiple submission, and aiding others to cheat.

Policy on Academic Integrity:
http://web.uvic.ca/calendar/undergrad/info/regulations/academic-integrity.html

If you have any questions or doubts, talk to me, your course instructor. For more information, see http://www.uvic.ca/learningandteaching/students/resources/expectations/.

ACCESSIBILITY

Students with diverse learning styles and needs are welcome in this course. In particular, if you have a documented disability or health consideration that may require accommodations, please feel free to approach me and/or the Resource Centre for Students with a Disability (RCSD http://rcsd.uvic.ca/) as soon as possible. The RCSD staff is available by appointment to assess specific needs, provide referrals, and arrange appropriate accommodations. The sooner you let us know your needs, the quicker we can assist you in achieving your learning goals in this course.

POSITIVITY AND SAFETY

The University of Victoria is committed to promoting, providing and protecting a positive and safe learning and working environment for all its members.

COURSE EXPERIENCE SURVEY (CES)

AT the end of term you will have the opportunity to complete an anonymous survey regarding your learning experience (CES). The survey is accessed via MyPage and can be done on your laptop, tablet, or mobile device.
