DEPARTMENT OF GEOGRAPHY LECTURE SERIES

Dr. David Atkinson (UVic Geography)

Building Northern Resilience: Community solutions and the Federal Environmental Prediction Services

This talk will overview projects to bring Northern communities together with the Meteorological Service of Canada and how the process of needs identification for both communities evolved.

We will look at an example of merging Traditional and Western approaches to environmental understanding that achieved a result neither approach could have realized alone.

Friday, Sept 29th @ 2-3pm | DTB B215

Everyone welcome. Bring your coffee mug! ☺
