Simon Minshall, MSc (Assistant Teaching Professor; PhD Cand.; MSc Health Informatics, UVic, 2019; BSc Photographic and Electronic Imaging Science, 1996) teaches a variety of challenging topics in Health Informatics to undergraduate students in the UVic School of Health Information Science. As an ATP, Simon is currently focused on teaching: (a) computer programming to non-major undergraduate students, (b) the flagship introductory course on Health Informatics, and (c) the undergraduate capstone course. He consistently achieves high evaluation scores from his students and peer reviewers and has been nominated for a faculty teaching excellence award. Simon is also the Coordinator for the HINF School's Health Terminology Standards Graduate Certificate Program. Simon engages with research projects, both locally and internationally, related to visualization, public health informatics, and clinical informatics. He has published eight peer-reviewed articles and conference papers; and, is currently PI on a grant-funded multi-year research project about service utilization in allied health. Simon fulfils his academic service responsibilities with dedication, contributing as co-chair of the School's Technology Committee, as vocal member of the University Senate for the faculty of Human and Social Development, and as a member of several University-wide committees, such as the Senate Committee on Academic Health Programming. In 2023, he undertook the role of Acting Director of the School, further exemplifying his commitment to the University's mission.
