

Biographical Sketch and Statement of Candidacy

I am an Assistant Teaching Professor in the Department of Physics and Astronomy. Additionally, I am the Liaison between the Faculty of Science and the Centre for Accessible Learning. The Liaison role is a new role, with a mandate to help facilitate communication and coordinate efforts to meet the accommodation needs of students with disabilities in the Faculty of Science. Additionally, I serve on my department's curriculum, student careers, and outreach committees.

I am interested in joining the Senate to participate in the governance of UVic. My primary topics of concern are teaching technologies/modalities and disability accommodations/equity; however, I am also concerned with issues related to education quality and integrity. I am a strong believer in transparency in governance and accountability. As a newer member of the faculty, I hope to share my energy and enthusiasm for higher education with the greater university community.
