

Third year commerce student with an interest in business consulting for nonprofits. When not at school, I volunteer as a consulting director at the UVic consulting group and serve on the board of my local community centre. I'm excited to be a part of the UVic senate!

As a student senator, I will work to consult with a diverse group of students and student bodies on important senate issues to increase democracy. Additionally, I will advocate for asynchronous recorded lectures for students in order to increase accessibility given the reduction in health mandates at UVic.
