Roy Suddaby is the Winspear Chair in Management in the Gustavson School of Business at the University of Victoria. He joined the School of Business on January 1, 2015. He has served on a wide variety of committees within the school and is currently the Associate Dean of Research and Faculty Development. He is an Associate Editor of the Academy of Management Perspectives, the Academy journal dedicated to publishing policy oriented research and theory and he is the Division-Chair-Elect of the Management History Division Interest Group of the Academy of Management. Roy is also a director of the Society of Advanced Management Studies, the organization that oversees the Journal of Management Studies and a member of the Research Oversight Committee for EcoToxChip, a large-scale ecological research project funded by Genome Quebec and centred at McGill University. Roy’s research focuses on processes of socio-political, technological, and institutional change. His current project, funded by SSHRC, examines the social and environmental impact of the revolution in acellular meat production. Roy is an elected Fellow of the Academy of Management.
