

My name is Jeffrey Bruton and I hope this new year and indeed this new decade are getting off to a great start for you! I believe with all my heart this new year and new decade are full of the most amazing potential and possibilities!

I am running for the graduate student representative position on the Board of Governors, and for a student representative position on the Senate because I want you to have a representative on these two policy making bodies that has decades of board, business, and educational experience...and someone who always has your best interest foremost in mind. Also, I love doing the type of work these two bodies do.

My Master's degree is in Music Technology and I have been a recording engineer and producer for many years, in addition to being a faculty member at university teaching audio and broadcast production. I am currently pursuing my PhD in Education here at UVic and am loving it! You all are the most amazing community!

I have started and currently own three corporations. One is a residential green building company, and the other two are media and technology companies. I spent five years on staff at Microsoft as a Sr. Systems Engineer building and maintaining the giant Internet sites such as microsoft.com, and I have been on the board of non-profits and for profit companies for many years, as I am now.

All of this is to say if you elect me you will have someone with experience looking out for your interests. More than that you'll have someone representing you who always strives for a "win-win" outcome, who will respond in a timely manner, and who wants you to have the most amazing time here at UVic!
