I am a 4th year student with a Major in History and a Minor in Applied Ethics. I have been heavily involved in student politics and organizing over the past year and am excited for the opportunity to be furthered involved on campus. Specifically, I have been involved with Divest UVic and am frustrated by the university’s unwillingness to take any meaningful stance to address the climate crisis. On the senate, I will advocate and push for full divestment from fossil fuels by 2025. It’s well past time for UVic to live up to its own rhetoric of sustainability. Further, I will support initiatives to help the campus more affordable and accessible.

As a member of the UVic Senate, I will help create an academic atmosphere where students are not unintentionally penalized for supporting social movements and causes within our local community. UVic has been a leader in climate research and instrumental in furthering academia; it is my intention to ensure that UVic does not get left behind as progress is being made on other campuses across Canada.

My intention is to:
- Work to increase and promote transparency within the Senate, as well as in the other governing bodies of the university
- Hold UVic accountable to their values of reconciliation, which has come to the forefront during the current CGL crisis. We will make sure UVic stands by it’s stated values and supports students who stand in solidarity
- Support initiatives regarding mental health support, sexualized violence, and decolonization
