I am delighted to announce my candidacy for the University of Victoria Senate.

My journey at UVic began in 2012 as a student majoring in Political Science and minoring in Anthropology. As an undergraduate I was encouraged to join UVic’s co-op program and became an educational technology co-op student with Technology Integrated Learning (TIL) in 2016. Pivoting from being a political science student to an educational technologies staff member was a great opportunity to learn the operational side of UVic's learning technologies; I also gained a greater appreciation for the work and considerations that go into developing and administering the courses that I had learned so much from as a student.

I graduated with my BA in June 2018 and became a full-time Ed Tech Specialist with TIL. In March 2020, I began working with University Systems and am now a Learning Systems Technology Support Analyst with the UVic Computer Help Desk. In this position, I have had the opportunity to work on our Microsoft 365 training program and train our campus community on Microsoft Teams.

I am excited at the prospect of serving on Senate Committees to hear appeals, consider program changes, review processes, and much more. During my career at UVic I have had the opportunity to work on projects borne from the Senate Committee on Learning and Teaching initiatives and am keen to work on these initiatives and innovations as a member of Senate. My experiences with working with students, faculty, and staff will help me make meaningful contributions to Senate.

If elected, I will bring my passion for this campus as well as my knowledge and experience with UVic’s learning systems to the University of Victoria Senate. Thank you for your consideration.
